# Practical No 7

Aim: Write a program for web feed.

1. Start wampserver64. Keep it open.
2. Create a folder rss at "C:\wamp\www"

3. Open Notepad. Type the following code:

```
<?xml version="1.0" encoding="UTF-8" ?>
<rss version="2.0">
<channel>
<title>ITVoyagers</title>
<link>http://itvoyagers.in</link>
<description>ITVoyagers is an educational blog for information technology and computer science program.We have started this
blog with a goal of meeting the requirements of learners to cope with the changing technology. We are aiming to expand its scope in all sections of IT.</description>

<title>Geographical Information System </title>
<link>https://itvoyagers.in/advance-topics/geographical-information-system-gis/</link>
<description>Geographical Information System Practicals</description>
</item>
</channel>
</rss>
```
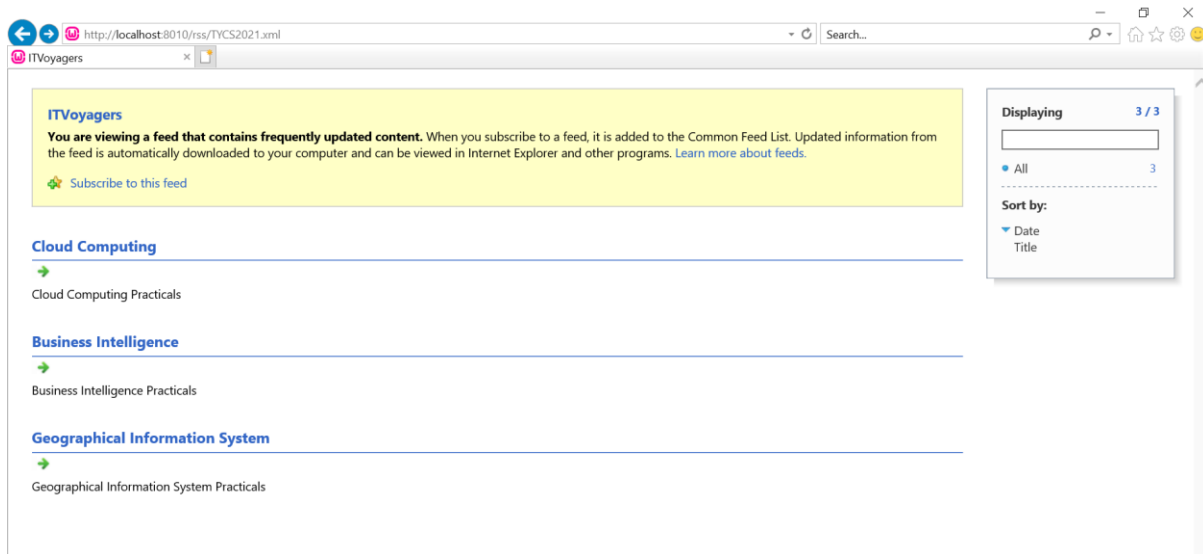

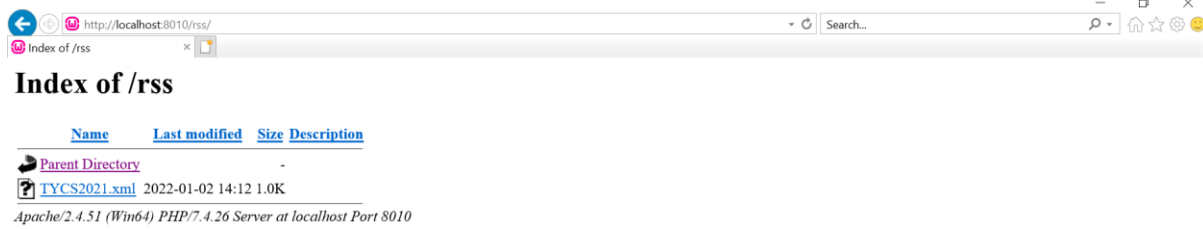

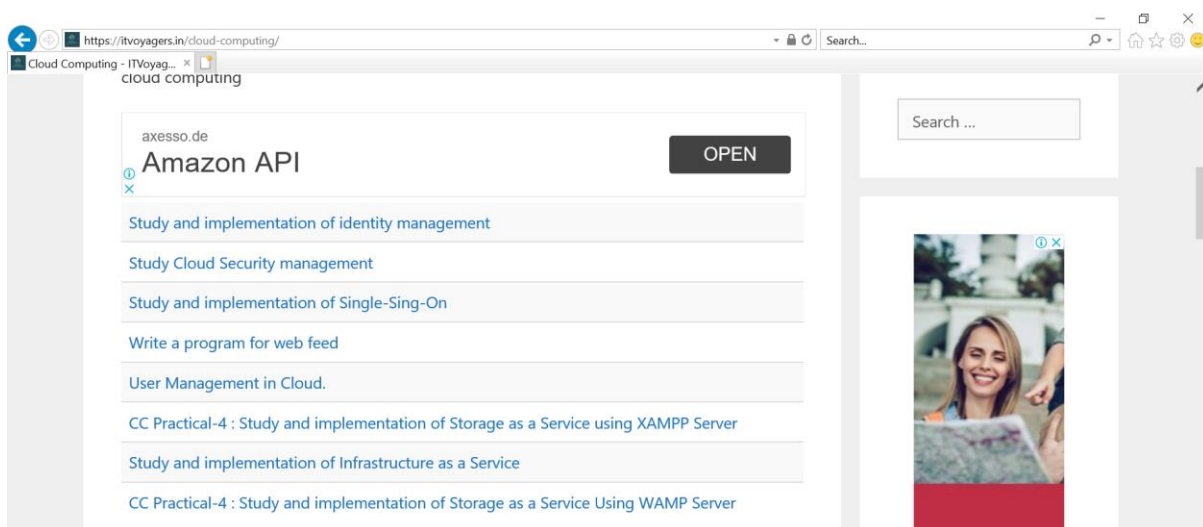

**Save it using TYCS2021.xml**

Location : "C:\wamp\www\rss"

Now click localhost from wampserver.

# Index of /rss

| Name | Last modified | Size | Description |
|------|---------------|------|-------------|
| Parent Directory | | - | |
| TYCS2021.xml | 2022-01-02 14:12 | 1.0K | |

Apache/2.4.51 (Win64) PHP/7.4.26 Server at localhost Port 8010

If your web browser is not supporting xml file then download rss extension. Using this link.

You will be redirected to the following page

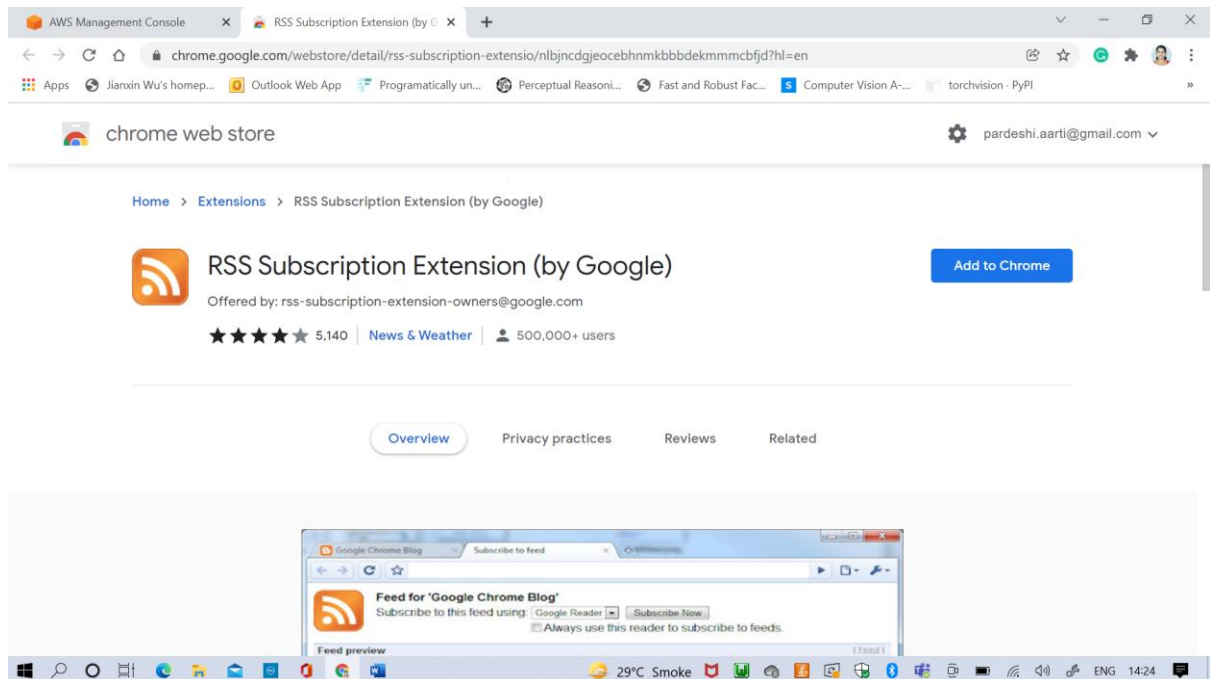

Add to chrome and refresh the TYCS2021.xml again.

**Note that:**

What is RSS?

RSS (RDF Site Summary or Really Simple Syndication) is a web feed that allows users and applications to access updates to websites in a standardized, computer-readable format.
